Office Action Summary	Application No. 10/773,267	Applicant(s) LEE ET AL.	
	Examiner C. J. Arbes	Art Unit 3729	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3729

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-8 and 11-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It appears the term "squeegee" in these claims lack a proper antecedent basis and hence the claims are held not to distinctly claim nor particularly point out the claimed invention

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 9 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japan Pat No. 10-205066 by Naoto et al; hereinafter Naoto et al.

Naoto et al teach a method for making a printed wiring or circuit board having a plurality of first circuit patterns e.g. at 21 formed on the surface of the board and a plurality of second circuit patterns e.g. at 22. A conductive layer is formed of a surface of the board and a through is drilled therethrough. A plating film e.g. Palladium and thereafter a Copper coating are formed on the board's surface as well as on the surface on the through hole. A resist film is then put onto the surface as well as into the through hole. Subsequently the through hole is filled with an epoxy. Any excess epoxy

which is higher than the outside surface of the substrate is buffed or ground off the surface of the board. Thereafter a solder plating is performed on the upper surface of the first circuit patterns.

Claims 5, 10 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. J. Arbes whose telephone number is 571-272-4563. The examiner can normally be reached on M, T, R and F from 8 to 6.
